

PCD 刀具

金刚石焊接刀具：直接在刀体上焊接一块金刚石制作而成，使用场合与金刚石刀片一样。金刚石焊接刀制作周期较短，外形可以非标设计，一般还可以返修数次，性价比极高

PCD brazed cutting tool

PCD tips are brazed directly on the tool holder, and have the same applicability as PCD inserts; PCD brazed tools take short lead time, special design available, re-sharpening is accepted, high performance- cost effectiveness

PCD 标准刀片

采用韧性的硬质合金材质作为基体,焊接 PCD 刀头刃磨而成。

与合金刀片可以通用刀杆

PCD 刀片一般提供单刃结构,可提供目前常见的型号规格;

可根据客户要求提供常规刃口,高光刃口等刃口参数结构。

PCD Standard Insert

It is made of tough cemented carbide material as the base material; braze the PCD onto the cutter and then do the grinding.

Same tool holder as carbide insert;

PCD tool generally is with single insert structure, which can

provide common models and specifications;

According to customer requirements, we can provide regular cutting edge, wiper cutting edge and other cutting edge parameter structures.
