

树脂切割片

(1) 平行切片

应用：可用于各种包括碳钢，不锈钢等众多金属的切割和开槽。

特点：平行切片是目前我司生产最多，最节约成本的树脂切片。

(2) 跋形磨片

应用：可用于各类金属加工作业。

特点：钹型砂轮选用特殊品质的棕刚玉磨料，砂轮性能稳定，性价比高。

(3) 切磨片

应用：可用于各类手工作业及非平面，非固定的加工。

特点：整片覆盖高强度的玻纤网，适用于各种操作环境。

(4) 超薄切割片

应用：可用于各项金属切割工序。

特点：超薄切片提供给您最顶级的切割手感。

(5) 可弯曲磨片

应用：适用于各类小型磨削工序。

特点：可弯曲砂轮由白刚玉和单晶刚玉制成，结构柔软。

Cut-off & Depressed Center Wheels

(1) T41 Cut-off Wheels

Application: Ideal for metal slotting and cut-off applications on a variety of metal applications from carbon to stainless steels.

Features: Maximum productivity and low costs cutting wheel.

(2) T27 Depressed Center Wheels

Application: Ideal for a variety of metalworking applications.

Features: Depressed Center Wheels feature quality aluminum oxide abrasive for consistent, maximum performance of aluminum oxide wheels at a competitive price.

(3) T42 Depressed Center Cutting & Grinding Wheels

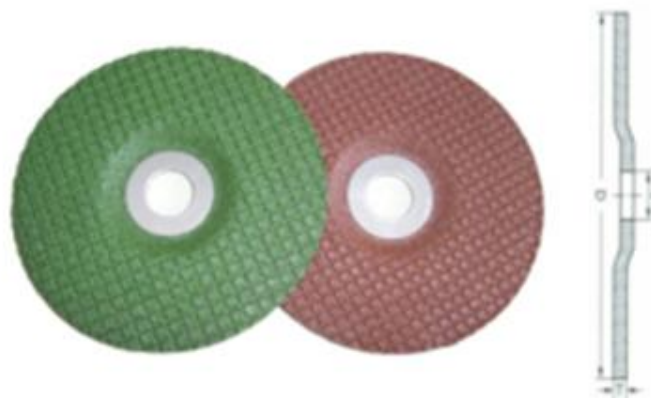

Application: Ideal for any operation where the grinder is hand-guided (portable) or where the work is not securely clamped.
 Features: These reinforced cut-off wheels contain strengthening fabric or filament throughout the entire diameter of the wheel.

(4) T41 Ultra Thin Cut-off Wheels

Application: Ideal for a variety of metal application.
 Features: The ultra thin cut-off wheels line gives you a top tier, highest-performing line.

(5) T27a Flexible Grinding Wheels

Application: Ideal for stacking and hardening of resin cutting wheel (disc).
Features: Stable quality, high durability, non-deformation, moderate tenacity, maintenance-free, easy operation, complete in specifications.
