

## 磨用电主轴 Grinding spindle

**产品特点：**1、恒功率段设计降低变频器成本；

2、应用 P4 级精密陶瓷球轴承，寿命可靠；

3、铜转子电机或进口电机，热损耗低。

**应用场景：**适用于内圆磨削、外圆磨削、拉刀磨削和螺纹磨削。

Product features:

1. Constant power section design reduces the cost of the inverter.

2. Reliable life with the application of P4 precision ceramic ball bearings.

3. Low heat loss with use of Copper rotor motor or imported motor.

Application: suitable for internal grinding, external grinding, broach grinding and thread grinding.
