

切割砂轮

Cutting Blades

Cutting blades are mainly used for precise cutting or slotting kinds of metalloid materials like carbide and ferrous metal like tool steel, mould steel, HSS and so on.

切割砂轮主要用于硬质合金等硬脆材料及各种铁系金属材料比如工具钢、模具钢、不锈钢等的切断及开槽等。

Main features:

High precision, for grooving and cutting off.

Sharp-edged, high efficiency.

Good rigidity, high strength and long life-span.

主要特点：

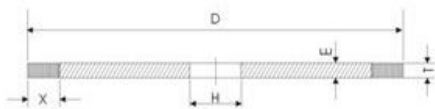

高精度，可用于精密开槽及切断；

切割锋利、加工效率高；

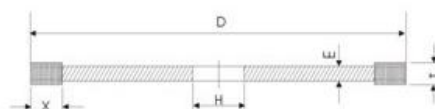

高刚性、高强度、使用寿命长。
