

毛刷系列产品

含磨料尼龙刷是一种工业刷，主要用于去毛刺，刀口钝化和表面精整加工。

Abrasive nylon filament brushes belong to industrial brushes, mainly for clearing burr, passivating edge and surface finishing.

成都工研有限公司生产的含磨料尼龙刷。尼龙丝中均匀掺入碳化硅或氧化铝磨料。根据加工要求，刷子可制成盘刷、孔刷、轮刷、笔刷和碗刷等各种型式。含磨料尼龙刷具有优良的变形恢复能力，遇水、油其性能几乎不受影响，并对大多数化学品抗腐蚀。

Chengdu Tool Research Institute Co., Ltd produced the abrasive nylon filament brushes with equable silicon carbide and aluminium oxide abrasive in the nylon filament. The brushes can be in disk, hole, wheel, pen and bowl shape to adapt the working requirement. The abrasive nylon filament brushes with excellent displacement restoring capacity, keep unacted on water or oil even chemical's corrosivity.

众多的含磨料尼龙丝相当于同等数量的柔性锉刀，加工零件时，可任意弯曲，自然贴合到工件轮廓上，进入沟槽，裂缝等一般工具难以进入的地方，将毛刺去掉，锐边倒钝为光滑均匀的圆弧，达到去毛刺、刀口钝化和表面精整加工的理想效果。比起喷砂、震动等工艺，该方法噪音低，无污染、利于环保。

Numerous abrasive nylon filament equal to same quantity flexibility file, can be curve freely and joint work-piece face naturally, can enter the harder space like grooving and breaking to clean burr, to passivate edge and finish surface. Comparing with sand

blast and shake, the brushes with the advantage like lower noise, no pollution, more environmental.

含磨料尼龙刷的典型应用:

Application of abrasive nylon filament brushes:

汽车、摩托车行业: 发动机缸盖、缸体、凸轮轴, 化油器, 燃料喷嘴, 活塞, 变速器, 电池箱去毛刺; 油漆、涂层前表面的精整加工等。

Automobile Motorcycle filed: clean burr for engine cylinder head, body and crankshaft, carburetor, fuel injection nozzle, piston, transmission and battery tube. Surface finish before painting and coating.

工具行业: 硬质合金, 金属陶瓷刀片、整体硬质合金等刀具钝化抛光。

Tool field: polish and passivation for carbide tools, cermet tools and solid carbide tools.

钢、铁、有色金属行业：电镀、涂层加工前，金属表面的精整加工，铝型材表面，切断面的精整加工、去毛刺。

Steel, iron, nonferrous metal filed: surface finish before electroplate and coating;

Clean burr and surface finish for aluminium profile

PCB(电子线路板)：铜板表面精整加工，增加对环氧树脂的黏着功效、钻孔去毛刺等。

PCB(Print Circuit Board): Surface finishing on brass board, increase adhesion with epoxy resin, drill hole and clean burr, etc.

木工行业：三合板精整加工、去毛刺、以增加黏合功效；各种木地板的修整等。

Wood filed: finishing three-ply board, cleaning burr to increase adhesion.

加工行业：各种零件的钝化、去毛刺、表面修整等。如交叉孔、阶梯孔、内、外螺纹、齿轮等

Machine filed: passivating, clearing burr and surface finishing for spare parts.

Such as: cross hole, ladder hole, internal/external hole and gear.

本公司生产的含磨料尼龙刷，经汽车、发动机、刀具制造行业使用，完全可以取代进口产品。

Our abrasive nylon filament brushes can replace the import products in automobile, engine and tools field.

现有磨料丝

Abrasive Filament

含磨料尼龙丝品种 type			磨料 abrasive material
1. 4x80#	1. 12x80#	1. 12x120#	碳化硅 Silicon carbide

0. 61x120#			

0. 48x500#	0. 3x600#	氧化铝 Aluminium oxide
------------	-----------	------------------------

本公司可根据用户需求，设计制造各种形式的含磨料尼龙刷

We can special design and manufacture by user demand.

孔刷、盘刷高效解决方案 汽车工业

Tube brushes, disc brushes solution case in automobile filed

发动机缸盖 engine cylinder head

含磨料高效孔刷，缸体活塞孔、油孔 去毛刺、抛光

毛刷材质柔软，不会出现类似砂轮或研磨带的残留物带来的气孔堵塞

For the flexibility of filament, when using tube brushes to clean burr and polish on piston hole and oil hole, will not produce residue blocking gap hole, better than sand wheel and grind.

含磨料高效盘，刷缸体装配面去毛刺、抛光
能获得无与伦比的工件表面质量和效率的成倍提升

Using disc abrasive brushes to clean burr and polish on fitting face will got perfect result and double efficiency.

盘刷高效解决方案 工具行业

Disc brush solution case in tools filed

硬质合金，金属陶瓷刀片、整体硬质合金等刀具钝化抛光。

Passivate and polish for carbide tools, cermet tools and solid carbide tools.

(本公司生产的数控钝化抛光机)

CNC passivating and polishing machine manufactured by Chengdu Tool Research Institute Co., Ltd

机械部件等的交叉孔内的微小毛刺清除 机械加工业

Cleaning the micro burr in internal of cross hole for machining field
