

# CBN 刀具

## CBN Cutting Tool

与硬质合金及陶瓷刀具相比，采用 CBN 铣削刀具加工铸铁和淬火钢时具有以下明显优势：

- 更高的效率
- 更长的刀具寿命
- 更低的综合加工成本
- 更好的工件表面光洁度

Compared to carbide and ceramic cutting tool, CBN milling cutting tool shows competitive advantages in cast iron and hardened steel machining

- Higher Efficiency
- Longer Cutting Tool Life
- Lower Machining Cost
- Better Component Surface Finish

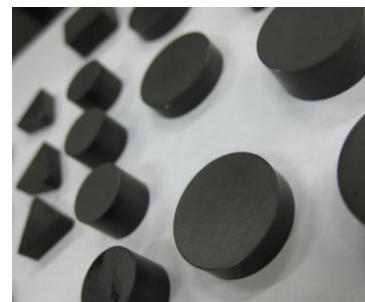

用途：

各种整体的 CBN 刀片；

主要应用于轧辊、矿山机械、汽配（刹车盘、制动鼓等）、石油机械等领域，应用领域涵盖粗加工、半精加工，精加工。

Application

- Various solid CBN insert
- It is mainly used in roll, mining machinery, auto parts (brake disc, brake drum, etc.),

petroleum machinery and other fields.

The application fields include rough machining, semi finishing and finishing.
