

Diamond blade

金刚石切割片

Diamond blade are used to remove the head and tail of the sapphire crystal or to make the square

金刚石切割片是用于去除蓝宝石晶锭的头尾或者晶坨开方。

Main features

Thin thickness, small slits-high raw material utilization, less waste;

High sharpness and high precision-good surface quality of the cutting workpiece;

Long lifespan and stability-reduce processing costs

主要特点：

厚度薄、切缝小——原材料利用度高，浪费少；

锋利度高，精度高——切割工件表面质量好；

寿命长、稳定——降低加工成本

Specification:

Universally specification (mm)	
M1A1R	200D*1.2T*31.75H*1E*5X
