

硅锭磨削砂轮

Grinding wheel for silicon ingot

Application 应用领域

用于单晶硅、多晶硅硅锭的平面，以及 C/R 面（倒角面/圆弧面）的加工,含粗磨和精磨。

It is used for surface grinding, flat/round chamfering, rough grinding and final polishing of monocrystalline/polycrystalline silicon ingots.

主要特点：

加工效率高

磨削质量好 $Ra < 0.1$

寿命长, 粗磨不修或精磨修整间隔长

Main features:

High grinding efficiency with good quality $Ra < 0.1$

Long life, no need to dress for rough or long dressing interval for fine type.
